Our Laboratory

The department is having five pharmaceutics labs including instrumentation lab and machine room. All labs are well equipped with sophisticated instruments such as, Brookfield Viscometer, 12station Tablet Compression Machine, I-disso Electrolab etc. The objectives of these labs is to provide practical exposure to the budding pharmacists on Physical Pharmaceutics, Manufacturing Operations, Pre-formulation Screening Tests, Designing, Evaluation and Pharmacokinetic study of solid, liquid, semisolidsl.

Pharmaceutics Lab

solid dosage forms including Novel Drug Delivery Systems for ocular, nasal, transungual, transmucosal, translabial, transnabhi, soft palatal drug delivery systems etc., which curtail the drug dose and minimizes the drug adverse reactions with excellent patient compliance.

Pharmacognosy Lab

Pharmacognosy is a specific discipline that deals with the rapid developments in the knowledge and utilization of medicinal substances of biological origin (plant, microorganism and animal products) used for human and veterinary purposes. The laboratory has various instruments like Soxhlet apparatus, Laminar Air Flow, Digital Balance, Calorimeter, UV cabinet.

Pharmaceutical Chemistry Lab

Pharmaceutical chemistry includes synthesis and identification of organic and inorganic compounds. Studying pharmaceutical chemistry allows students to contribute to life-saving remedies, enhance the speed of delivery of new medications, and help other.

Pharmacology Lab

Pharmacology lab consists of equipment to investigate the activity of various drug samples, such as Rota Rod, Electro-convulsimeter, Analgesiometer, Histamine chamber and Actophotometer.
